PROAVIA member use case

HOW CAN A TEMPORARY BHS SUPPORT REMOTE CHECK-IN FOR A MAJOR INTERNATIONAL EVENT?

France·ORY – 2026

01 THE CHALLENGE

The project consists of achieving a Baggage Handling System dedicated to Games 2024 within a very short time (9 months) and allowing remote check-in. The other particularity of the project is to proceed with check-in remotely at the athlete's village.

02 THE SOLUTION

The solution is based on :
5 baggage handling lines
- Automated software solution based on PLCs, HMIs, baggage tracking
- Interface with baggage reconciliation and tracking system
- Primary and secondary lines for normal and oversized baggage
- Integration of several screening machines from distinct manufacturer brand

03 THE RESULT

RESULT
- Deadline reached
- Availability
- 100% of baggage sorted and processed securely
- Removable and reusable solution
