HOW CAN BIOMETRIC PROCESSING IMPROVE SECURITY AND CAPACITY WITHOUT EXPANDING THE TERMINAL?

Émirats arabes unis·AUH – 2026

01 THE CHALLENGE

Forging the future of air travel using facial recognition for swift and secure passenger authentification.

02 THE SOLUTION

Thanks to thee Signel Token Journey (STJ) solution the travel journey is seamless. This integrates biometric technology across key touchpoints – automated check-in, self-service baggage, and e-gates – enabling document-free, secure travel.

03 THE RESULT

Processing times have dropped from 25 seconds to just 7 seconds, boosting efficiency and reducing resource dependency. By 2025, the goal is to implement this solution across all airlines, setting a new standard in smart, secure travel.
