PROAVIA member use case

IMPROVE THE CUSTOMER AND THE PASSENGER EXPERIENCE AT THE SAME TIME?

Aucun·Aucun – 2026

01 THE CHALLENGE

Airports and transportation hubs all over the world face the increase of traffic and shall update constantly their seating and processing capacities together with services and commercial areas .People complain about the lack of seating and mechanical aid to walk inside the airports.

02 THE SOLUTION

An all-in-one device for maximum flexibility: It is a cart, a seat and stroller.
Smart and playful, it can be used for all the passenger profiles, specially aging populations.
It is connected to the building and provides valuable information regarding behavioral customer experience. Compatible with BIM systems for seamless integration.
It features an efficient friction-based charging system, along with geolocation and feedback functions via a mobile app.

03 THE RESULT

PAX is an awarded innovation product that will change the passenger experience. It is currently at the prototype state.
