HOW CAN AIRPORTS STRENGTHEN CYBER RESILIENCE ACROSS CRITICAL IT AND OT SYSTEMS?

France·TLS – 2026

01 THE CHALLENGE

Facing evolving cyber threats and imminent NIS2 regulations, ATB needed to transition from reactive security to proactive 24/7 defense capability, safeguarding critical infrastructure to ensure operational continuity and passenger safety.

02 THE SOLUTION

Managed SOC MDR: deployed 24/7 continuous monitoring across both IT and OT systems.
Proactive defense: enable real-time threat detection and rapid incident response.
Industrial fit: leveraged Airbus's expertise to adapt to specific airport operational constraints.

03 THE RESULT

360° visibility: achieved 24/7/365 surveillance of the entire threat landscape.
Rapid response: drastically reduced time for threat detection and incident qualification.
Full compliance: aligned with the strictest standards for essential service operators.
Sovereignty: secured collaboration with a trusted European partner and local exp
