ENHANCE BOARDING EFFICIENCY AT QUITO INTERNATIONAL AIRPORT ?

Équateur·UIO – 2026

01 THE CHALLENGE

Implement an innovative solution that enables fast, secure biometric boarding, while making the boarding process faster and safer.

02 THE SOLUTION

EASIER installed 15 Skylane biometric boarding gates, allowing passengers to identify themselves and board in less than 2 seconds without the need for a boarding pass or passport.

03 THE RESULT

Passengers can now board quickly and efficiently, enjoying a smoother and seamless travel experience, positioning Quito Airport as the first airport in Latin America to offer this technology for flights to the United States.
