PROAVIA member use case

STREAMLINE CHECK-IN TO BOOST PASSENGER SATISFACTION ?

Aucun·Aucun – 2026

01 THE CHALLENGE

Congested traditional check-in counters
Need for faster passenger processing
Growing demand for self-service in airports

02 THE SOLUTION

Multi-airline self-tagging for autonomous passengers before heading to a self-bag drop solution or a common bag drop counter (two-step process)
Designed for passengers with mobile or home-printed boarding passes
High-visibility, vertical self-tagging kiosk with strong brand presence
Intuitive and smooth process

03 THE RESULT

One common-use kiosk for multiple airlines
Airline-specific business rules integration
One-time training for agents
Dual printers + extended roll storage for continuous operation
Energy-efficient 24V power supply and programmable standby mode
