Newcastle International Airport

by **orbility**

Express Car Park "pay on exit" system

The Solution

Orbility is the provider of the car park management system for Newcastle International Airport, which includes equipment, the system itself, and a ticketless passenger drop-off solution.

Specific equipment configurations include a successful pay-on-exit solution. Here, customers can pick up and drop off their passengers directly outside the terminal before proceeding to the exit points to make payments using either coins or credit cards. Cameras record vehicle entries and exits through automatic number plate recognition (ANPR), ensuring high accuracy in reading license plates and facilitating a speedy exit from the car park.

Benefits

- Cost-effective and efficiently high levels of reliability and performance

- Simple to integrate into existing airport systems and infrastructures

- Reliable performance, accurate financial reconciliation capabilities, and the resilience of equipment exposed to, at times, severe wintery weather conditions

TESTIMONIAL ★ ★ ★ ★ ★

A NIAL spokesperson said of the project

"Our investment in Orbility's car parking solutions has afforded us the ability to offer a range of reliable parking options which our customers demand from us when visiting our airport. Air travel can at times be stressful and we are working hard to mitigate this by offering a positive customer experience which for many starts in our car parks".
