OUR BESPOKE SOLUTIONS

—
Cultivating a **multi modal, efficient & user centric** airport hub.

—
Fostering the evolution of a **diversified airport city** into a key economical regional driver.

—
Elevating **operational performance and sustainability** through extension/renovation of your assets.

—
Establishing **robust funding arrangements** with leading international financial partners.

By leveraging our proficiency across the complete value chain, we bring forth projects marked by comprehensive integration where the initial financial structure aligns with the long term interest of users, and where the airport design is optimised for commercial revenues to the benefit of the competitiveness of the airport.

OUR CORE COMMITMENTS

- We challenge convention and deliver **holistic** solutions that **exceed** expectations.
- We foresee emerging **trends** and cultivate **innovation**.
- We **leverage** our global experience to suit your **local** context.
- We lead the way in airport sustainability by focusing on **low carbon buildings** for a greener future.

OUR CASE STUDIES

The DBFMO project for 2 terminals in Cyprus aimed at raising a private financing facility of EUR 612 million.

The 132,000 sqm Asia World Expo has been a major PPP project related to the development of Hong Kong International Airport.

The EDGE certified Madagascar Airports project met our social and operational commitments, resulting in 30% and 23% growth in passenger traffic and operating airlines respectively.

Zagreb International Airport's new terminal ensures operational efficiency as a hub and offers a passenger-centric environment.

OUR AIRPORT EXPERTS

We deliver complex infrastructure projects around the world, developing greenfield airport projects from inception to full operation. Bouygues Construction Airports gives us extensive experience in airport business growth. We maximize the airport business model right from the design stage. We are partners to public and private project owners, operators and funders.

Our professionals bring a wealth of expertise and knowledge - from airport design, engineering, financing, legal structuring to risk assurance - our diverse team brings distinctive perspectives that fuel a continuous stream of innovation. Aiming at offering cutting-edge solutions, we extend our in-house expertise partnering with leading consultants, engineers and architects with a multi-cultural approach.

INTERNATIONAL RECOGNITION

Larnaca, Cyprus - 10+ Global Awards

Iqaluit, Canada - 5 Global Awards

Zagreb, Croatia - 10+ Global Awards

Ivato, Madagascar - 10+ Global Awards

MAJOR AWARD ACKNOWLEDGMENTS

Our airport projects have received global acclaim and earned prestigious awards for excellence in project financing, passenger experience, and environmental design.
